

LEVER LATCH

STEP ONE

Unbolt Lever Latch from the gate and move it from it's shipping position (bars 3 & 4) on the gate to it's installation position (bars 2 & 3).

STEP TWO

Attach Latch Assembly to the opening side of the gate. Secure tube anchorplates to the two rails of the gate.

STEP THREE

Make sure Latch Assembly is flush against the opening end of the gate.

STEP FOUR

Attach bolts to the upper and lower slots allotted for them. Make sure the bolts are secure and tight.

STEP FIVE

Extend latch bolts to determine where to position latch receiver.

STEP SIX

Drill 1/4" holes using the latch receiver as a template. Insert and secure bolts with crescent or socket wrench. Slide latch into receiver.

STEP SEVEN

Attach latch bar and bolt securely to latch component*.

STEP EIGHT

Attach handle and bolt to secure*.

STEP NINE

Attach brace to handle to keep in place*. *NOTE: Handle and brace bolts may need adjustment for proper operation.*

YOUR LEVER LATCH IS NOW COMPLETE AND READY TO USE.
